Abstract: EP 425754 A1

A portable apparatus (1,100) comprising a radio receiver, a liquid crystal display screen (2) and alarm means (8,10) and carried by medical personnel by means of a belt clip (3) is adapted for monitoring physiological signals (5), in particular electrocardiogram signals, transmitted from one or more patients. In response to a suddenly changing condition of a patient, signal waveforms (E) are displayed and an alarm may be energised.
